WITH BEDS BUT NO ORS — no.1678818

Partner for Change (Beds) - 2016: Energy

Introduction

The generation of energy from fossil fuels emits a range of different pollutants, in addition to being the largest contributor to greenhouse gas emissions. Air pollutants from energy sources can cause asthma, respiratory disease and other ailments in the community. Please use this section of the application to enter your energy data and report on energy conservation successes. This section of the application is tied to the Climate section, due to energy's contribution to an organization's carbon footprint.

Energy Use Demographics

1. Please enter the facility's **Baseline Year** for Energy data:

Baseline Year is the year the facility began actively tracking energy and utility use or initiated a water conservation program. If you provide this historic data, it is worth additional points—so PGH can get a better sense of the facility's organizational progress over time and assess performance metrics.

PGH uses Energy Star Portfolio Manager's definition of **Gross Floor Area**. If the facility uses Portfolio Manager, you can cut and paste the value for **Gross Floor Area** into the application.

Please enter the facility's **Gross Floor Area in Square Feet** below:

Baseline Year Sq Ft	Previous Year Sq Ft	Current Year Sq Ft
<p>2.</p> <input type="text"/> <p>Enter same value for all three Gross Floor Area questions if the facility's Gross Floor Area has remained unchanged. These values will be pre-populated to the Water page.</p>	<p>3.</p> <input type="text"/>	<p>4.</p> <input type="text"/>

Energy Usage

New in 2016 All energy data must be provided for a 12-month **CALENDAR YEAR**, meaning we are seeking data from January 1, 2015 through December 31, 2015 only for Current Year. Baseline and Previous Year data will also need to be updated. The reason for this transition is that in order to appropriately compare energy performance, Practice Greenhealth has to utilize weather normalization. To use weather normalization appropriately, it

has to be the **same 12-month period** (e.g. we need to see energy use in an especially cold February for all sites for an accurate comparison--not just those who typically utilize a calendar year for reporting.)

Please provide details on energy usage at your facility.

5. Do you have an **onsite laundry**?

- Yes
- No

Please indicate the facility's energy use in **Table A** below. Every applicant is required to complete the CURRENT YEAR USAGE (2015) column, even if this is first year completing an application.

We also need the facility's baseline and previous year (2014) data. If this is your first year of tracking energy data, you should enter your 2015 data in both the baseline and current year columns and leave previous year blank. If last year (2014) was the facility's baseline year, enter it for both previous year and baseline year below. **If you do not use a particular energy type, please leave it blank. Do not enter zeros.**

PGH would like your facility to properly identify **energy used to power parking lots/structures** (lighting, HVAC, etc) and **remove this data** from your entries for energy use in Table A below. The first row of data in Table A should not include parking kWh.

6. Do you **submeter** your **parking** lots/structures?

- Yes
- No

6.a Are you therefore able to separate out (and subtract) parking lot/parking structure energy use from energy use totals?

- Yes
- No

NEW IN 2016 Facilities must use **calendar year data** for energy use (January 1st- December 31st).

Table A. Fossil Fuel-Based Energy Use Please check that the data for any given fuel type (electricity, natural gas, etc) is the same order of magnitude for all three years and check the units for each energy type for each year. It is best to include any given fuel type for all three years if appropriate.

63. Did you ensure energy data was entered for calendar year (Jan 1, 2015-Dec 31, 2015) only?

- Yes
 No

63.a Did you ensure baseline and previous year data was updated to calendar year as well?

- Yes
 No

Otherwise the facility **will not get credit for the energy reduction metric**--as it needs baseline and previous year data to be in same 12 month period as current year.

64. Does the facility generate or purchase **renewable energy**?

Yes

Please enter the facility's **renewable energy** use into Table B (including onsite generation or **renewable energy** purchases/RECs). If you do not purchase/have **renewable energy** sources, please leave blank. Do not enter zeros.

Energy Performance Metrics : Energy Use Intensity (EUI)

Table D auto-calculates and summarizes your **energy performance metrics** based on values entered in **Table A** above. If your EUI (kBtus/sq ft) is **less than 75 or greater than 480**, please review your energy data and **gross floor area** for errors. The median data from 2015 award winners was **237 kBtus/sq ft**.

Table D. Energy Use Intensity (EUI) Note: EUI values should be the same order of magnitude for all three years. Percent change from baseline should usually fall between 30-150%. Percent change from previous year will generally fall in the range of 20-120%. If this is not true of your data in Table D, please review your energy data in Table A and **gross floor area** above).

148. Has the facility engaged a **retrocommissioning firm to optimize building performance?**

- Yes
 No

148.a Name of firm engaged?

148.b Date of contract?

149. Does the facility **utilize submeters** to better monitor energy efficiency opportunities?

- Yes
- No

149.a Please indicate which **areas** have been submetered (e.g. by department, certain pieces of equipment etc.).

149.b Is the facility submetering specific **technologies** (such as MRI)?

- Yes
- No

149.b.a List the technologies that are being submetered (e.g., MRI, other)

149.c What has your facility found to be the **biggest benefits of submetering**?

150. Has the facility **collaborated** with the **Information Technology (IT) Department** to integrate energy efficiency measures?

- Yes
- No

150.a Please describe this work:

151. Does the facility have an **onsite data center** that requires a constant power load of **75 kW** or more?

- Yes
- No

EPEAT

152. Does the facility **purchase energy-efficient equipment** that is **EnergyStar labeled**?
