## Partner for Change (No Beds) - 2018: Waste

## Introduction

Practice Greenhealth recommends **comprehensive waste tracking** as a starting point for any healthcare institution looking to improve its environmental footprint. Understanding the breakdown of both cost and weight for different waste categories can be one of the easiest strategies to identify areas of opportunity and low-hanging fruit. Beyond waste data, understanding how waste can be prevented, or shifted from a more environmentally-intensive (and expensive) waste stream to a less environmentally intensive waste stream (e.g., from **regulated medical waste** into **recycling**) is key to truly reducing the facility's waste footprint.

**Baseline Year:** The facility's baseline year is generally the **first year the facility started tracking waste data**. Some facilities use the first year they apply for an award. If 2017 is your first year of waste tracking, please enter data in both the **Baseline Year** and the **Current Year** column (leaving the **Previous Year column blank**), and it will become your baseline for next year's award data.

## 1. Baseline Year:

The waste data in this section requires **12 consecutive months of waste data**. While energy data must be tracked in a calendar year, waste data can utilize a fiscal year if necessary. We ask that you please use the **same 12 months consistently** each year you apply, so we can compare year-to-year totals effectively.

## Solid Waste

Please indicate the facility's **Solid Waste** totals in Table A below (enter a numerical response). You are required to complete the **Current Year** column at a minimum.

If you are using a vendor that uses a **flat fee for integrated waste removal** (e.g., RMW and **solid waste** go out at the same price per lb), please enter your tonnage but do not include your cost data in Table A below, as it will skew the data set.

**Non-RCRA Pharmaceutical Waste** data will be captured in the category in which it is being treated/disposed. If the facility is segregating and collecting Non-RCRA Pharmaceutical Waste and disposing of it as solid waste (e.g. sent to a municipal waste incinerator), please enter Non-RCRA Pharm Waste data in **Table A. Solid Waste**. If Non-RCRA Pharm Waste is disposed of as **regulated medical waste** (e.g. sent to an RMW incinerator), please enter Non-RCRA Pharm Waste data in **Table C. Regulated Medical Waste**

DO NOT enter Non-RCRA Pharm Waste in both Tables A and C. This will double count this waste stream.

## Regulated Medical Waste

Please indicate the facility's **Regulated Medical Waste** totals in **Table C** below (enter a numerical response). If you cannot break out one of the waste types, please leave it blank and use the comments box to indicate which waste stream it is combined with; do not enter zero. If you are using a vendor that uses a **flat fee for integrated waste removal** (e.g., RMW and **solid waste** go out at the same price per lb), please enter your **tonnage**, but **DO NOT** include your **cost data** in **Table C** below, as it will skew the data set. All applicants must fill out **Current Year** tonnage and costs. If this year is your baseline year (e.g. first year of collecting accurate RMW data), please enter your **Current Year** totals in the **Baseline Year** column as well, but leave the **Previous Year** column **blank**.

### RMW Treated Onsite or Offsite:

Please include **all general RMW** in this number, including any RMW that is **treated onsite and landfilled**. If the facility normally combines treated RMW with its **solid waste**, please estimate weight or contact Awards Technical Assistance for guidance at [awards@practicegreenhealth](mailto:awards@practicegreenhealth) or 888-378-2259.

### Incinerated RMW

Please include any RMW that is incinerated, such as pathology waste, trace chemotherapeutic waste, or any waste that is segregated and removed by a licensed hauler for **medical waste incineration**. This category may be very small.

### Sharps

Sharps waste is typically tracked as a separate waste stream by **regulated medical waste** haulers and should be entered in the Sharps category. If sharps are incinerated, they can be included in the **Incinerated RMW** category, but it should be noted in the comments field that the waste streams are combined. If the facility uses a reusable sharps container service, make sure the sharps disposal data does not include the **weight of the containers**.

### Non-RCRA Pharmaceutical Waste

Non-RCRA pharmaceutical waste does not meet the EPA or state agencies' definition of hazardous waste but may still be dangerous to human health and the environment. Many health care institutions choose to use a vendor to manage this waste stream as incinerate-only to protect health. This waste stream is typically managed in a blue or white pharm waste container.

This waste stream can be incinerated as **municipal solid waste** (if so please track in **Table A**) or as **RMW** (please track in **Table C**). Please **do not** enter non-RCRA pharmaceutical waste in both tables **or it will be double-counted**.

**All Non-RCRA pharmaceutical waste data entered in either Table A or Table C will be autopopulated in Table E. Pharmaceutical Waste below.**

## Pharmaceutical Waste

### Non-RCRA Pharmaceutical Waste

Segregating non-RCRA regulated pharmaceutical waste for incineration is currently considered a best management approach. For facilities using a pharmaceutical waste vendor (not Reverse Distribution), this is typically the blue or white container. **Non-RCRA Pharmaceutical Waste** data is entered in **Table A** (if disposed of through municipal waste incineration) or **Table C** (if disposed of through RMW incineration). Data from Tables A or C will autopopulate **Table E. Pharmaceutical Waste** below. Pharmacy, Environmental Services, EH&S or your pharmaceutical waste vendor are good resources to identify the waste pharmaceutical tonnage.

### RCRA-Regulated Hazardous Pharmaceutical Waste

RCRA hazardous pharmaceutical waste is comprised of waste that is either listed as hazardous or meets the characteristics of hazardous waste in **EPA's Resource Conservation and Recovery Act (RCRA)** or via state agency. This waste stream should not be confused with red bag or "biohazardous" waste. For facilities using a pharmaceutical waste vendor (not Reverse Distribution), this is typically the black container.

Please enter the facility's RCRA Hazardous Pharmaceutical Waste totals in **tons** in Table E below. Entering RCRA Hazardous Pharm Waste data in this table will auto-populate Table G. Hazardous Waste below. Recently 34 drugs have been added to the **2016 NIOSH list of hazardous drugs**. Please see the CDC's 2016 publication **NIOSH List of Antineoplastic and Other Hazardous Drugs in Healthcare Settings, 2016**.

All applicants must enter **Current Year** tonnage and costs. If this is the first year for which you have accurate pharmaceutical waste data, please enter your **Current Year** totals in the **Baseline Year** column as well (but leave the **Previous Year** column **blank**). If the facility does not break out a waste type, leave that space blank and identify any combined waste streams in the comments box. **Do not enter zeros.**

Enter data in tons. Pounds can be easily converted to tons by dividing poundage by 2000.

- ☐ We treat all pharm waste as RCRA-hazardous to better protect human health and the environment
- ☐ Pharm waste is being disposed of in red bags or sharps containers

## Hazardous Waste

Please enter the facility's Hazardous Waste total in tons in **Table G. Hazardous Waste** below. All applicants must enter **Current Year** tonnage and costs. If this is the facility's first year of tracking comprehensive waste data, please enter the hazardous waste tonnage from **Current Year** into the **Baseline Year** column as well (but leave the **Previous Year** column blank).

**Do not enter zeros for any year. All health care facilities generate some amount of hazardous waste.**

### Converting to Tons

If your hazardous waste is in gallons or a mix of gallons and pounds, please convert to tons. It is most accurate to convert gallons to tons using the specific gravity of the waste liquid. However, if this is unavailable, convert gallons to tons using a general conversion factor of 8.35 lbs=1 gallon (e.g., there are approximately 8.35 pounds in a gallon of liquid). Pounds can be easily converted to tons by dividing poundage by 2000.

### RCRA-Regulated Hazardous Waste

Please note that your facility's hazardous waste tonnage **should not be zero**.

**Hazardous waste includes** waste solvents, lab fixatives and stains, spill clean-up residue, lab packs, refrigerants, or any "listed" or "characteristic waste" per RCRA regulations. Check with your Laboratory Manager, Pharmacy Director, Safety Director, Hazardous Materials Coordinator, hazardous waste hauler, Accounts Payable, or review waste removal manifests to identify hazardous waste removal documentation that will provide you with the data needed for this section. **Examples of hazardous waste** from the clinical laboratory can be found at: **Clinical Laboratory Waste**
