CEC_HOSPITAL — no.3532653

Partner Recognition - 2018: Water

Introduction

Water is a critical resource for community health and well-being. Because of the artificially low pricing for water, it can be challenging to get this program prioritized. However, water conservation remains a vital part of a strong environmental stewardship program. Tracking and measuring the amount of direct water used is the first step a hospital should take to begin its water management and minimization program.

Water Use Demographics

Practice Greenhealth introduced its **Less Water Goal** in 2016. See the **Less Water Toolkit** for more information and guidance on water reduction strategies.

1. Please indicate the number of **hemodialysis treatments** the facility performs annually (both at bedside and inpatient unit):

Water Usage

Please indicate the facility's **total water use in Table A** below. Please include irrigation water if applicable in these totals. All applicants are required to complete the **Current Year** water consumption data. If 2017 was your facility's Baseline Year, please provide the water consumption data for both Current and Baseline Year, and leave Previous Year blank. Do not enter zeros.

For **Gross Floor Area**, please enter the same value for all three years if the facility's **Gross Floor Area** has not changed. **These values will populate on both the Water and Energy pages.**

Please indicate the facility's water usage for the Current Year in Table A below.

Table A. Total Water Consumption

Table A. Water Consumption	Current Year	Units
Gross Floor Area	2. <input type="text"/>	Square Feet
Cleanable Area	3. <input type="text"/>	Square Feet
Annual Water Consumption	4. <input type="text"/>	5. <input type="text" value="Select an option..."/>

6. Your Current Year **total annual water consumption** (in US gallons) is:

If this number is zero, please check that you have selected units in the table above.

7. Was irrigation water included as part of overall water consumption in Table A above?

- ☐ Yes
☒ No

Practice Greenhealth asks that facilities include irrigation water in the totals above. Irrigation water will be broken out separately below for calculation of more precise water use metrics.

7.a Please add irrigation water into totals in Table A if you can. Otherwise, please explain barriers to providing this data:

8. Please provide the Annual Costs (\$) for Current Year Water Consumption:

9. Has the facility set **measurable goals** for the reduction of water use?

- ☒ Yes
☐ No

9.a What is the facility's water reduction goal?

10. Does your facility irrigate any landscape areas?

- ☒ Yes
☐ No

10.a Please provide the **Irrigated Area** for the hospital campus (in square feet):

There are 43,560 square feet in an acre. To convert acres to square feet, multiply acres by 43,560.

10.b Does your facility **separately meter irrigation water** versus other water used for the facility?

- ☒ Yes
☐ No

10.b.a Please indicate the **gallons** of water used for **irrigation** in 2017 (actual):

10.b.c Based on the data above, the facility's (actual) indoor water use for 2017 is:

0

10.c Based on the data above, the facility's **Irrigation Water Use** for 2017 is:

0

This number will be used for calculation of Gallons of Water Use per Irrigated Square Foot.

10.d The facility's metric for **Gallons of Water Use per Irrigated Square Foot** is:

0

10.e The facility's **Indoor Water Use** for 2017 is:

0

This number will be used for calculation of Indoor Water Use Metrics in Table C.

Based on the data above, your facility's normalized **water use metrics** for Indoor Water Use are presented in Table C. below.

Table C. Indoor Water Use Metrics

14. Indoor Gallons per Square Foot (The 2017 median was 44.5 gal/ sq foot; values generally ranged from 5 to 200) <div>0</div>	15. Indoor Gallons per Cleanable Square Foot <div>0</div>	16. Indoor Gallons per FTE <div>0</div>
--	---	---

Given the data you provided in Table A, your facility's normalized **water use metrics** for Total Water Use are presented in Table B1 below. For comparison, data for Total Water Use from the 2017 award winners is presented in parentheses. If your consumption is out of the range presented, please review your **water consumption** and **square footage** data entered in Table A above.

Table B2 highlights the facility's normalized **water use reduction metrics**.

Table B1. Total Water Use Metrics

11. Total Gallons per Square Foot (The 2017 median value was 46.9; values generally ranged from 6.8 to 218): <div>0</div>	12. Total Gallons per Cleanable Square Foot (The 2017 median value was 54.1; values generally ranged from 9 to 253): <div>0</div>	13. Total Gallons per FTE (The 2017 median value was 20,635; values generally ranged from 3,100 to 155,400) <div>0</div>
---	---	--

Water Conservation

17. Does the facility **submeter** any departments and/or individual pieces of equipment?

- ☒ Yes
☐ No

17.a Please describe submetering of departments and/or equipment:

18. Does the facility have a **written plan to reduce water use** over time?

☒ Yes

☐ No

18.a Please describe written plan to reduce water use:

18.b Please attach written plan to reduce water use:

19. Does the facility **benchmark water usage**?

☒ Yes

☐ No

19.a What **software program, tool or company** did the organization utilize to benchmark water usage?

20. Does the facility purchase **US EPA WaterSense-labeled** devices and equipment?

Yes

20.a Please provide examples of WaterSense-labeled devices purchased by the facility in 2017:

21. Has the facility made any efforts to **reuse non-potable** water?

☒ Yes

☐ No

21.a If yes, please describe efforts to reuse non-potable water:

22. Does the facility use any alternative landscaping methods that **reduce the need for irrigation**?

- ☒ Yes
☐ No

22.a If yes, please describe alternative landscaping for irrigation reduction:

Please list the biggest **water-saving projects** implemented in 2017 in Table E. A minimum of three projects is suggested if possible.

Note: Your overall water use reduction is calculated above through percent water reduction from baseline, where you will get 'credit' for older water reduction projects. This table is ONLY for **projects completed in the past year**.

Table E: Water Reduction Projects

Project Description	Category	Water Savings (in gallons/year)	Annual Savings in USD \$ (real or calculated)
23. <div></div>	24. Select an option... <div></div>	25. <div></div>	26. <div></div>
27. <div></div>	28. Select an option... <div></div>	29. <div></div>	30. <div></div>
31. <div></div>	32. Select an option... <div></div>	33. <div></div>	34. <div></div>
35. <div></div>	36. Select an option... <div></div>	37. <div></div>	38. <div></div>
39. <div></div>	40. Select an option... <div></div>	41. <div></div>	42. <div></div>
Total		43. 0	44. 0

Successes

Please describe water reduction projects in Table E immediately above, or share other successful or innovative water projects / programs at your facility in 2017. Please feel free to provide commentary and/or attach a file.

45. Water Reduction Successes : (Please describe)

46. Please attach any additional documentation (optional) for Water Reduction Successes:

47. Please describe any lessons learned from water reduction projects:

48. Please attach any additional documentation (optional) for lessons learned or water reduction projects:
