Facility Demographic Information

2020 was a year of many challenges including the pandemic, rising tensions around racial disparities in the United States, and the growing impacts of climate change. As certain communities face a disproportionate burden and death toll from COVID-19, the call for an increased focus on social and environmental determinants of health and community collaboration becomes more urgent. Practice Greenhealth wants to better understand how hospitals have created unique partnerships and pivoted to adjust their sustainability work or emergency response efforts in response to these pressing challenges. We also want to identify any new and emerging needs for resources and support during this challenging time. Across the application, several questions have been added to address the impact of the pandemic on hospital operations.

Applicants may submit either a **Partner for Change** award application or a **Modified Partner for Change** award application, but not both. The Modified Partner for Change application was designed as an alternative for hospitals and health care facilities severely impacted by the pandemic. Applicants may fill out and submit either application. If you are having trouble deciding which application is more appropriate for your facility, please contact your Member Engagement liaison or **Awards Technical Assistance**.

If you do not have data that is specific to this campus or facility, do not enter it. For instance, if your system of 3 hospitals had 953 total **adjusted patient days**, but you cannot split that by facility, then leave **Adjusted Patient Days** blank. Likewise, if your health system bought \$5.6 million worth of computers, but you don't know how much was spent for each facility, please leave that field blank. **Please use this instruction throughout the application.**
