

Chemicals

Introduction

Chemical minimization programs are an important part of any sustainability program. The use of certain chemical constituents in products and materials can have significant health repercussions for building occupants, patients, staff, and the community. Likewise, the emissions and effluent from the manufacturing and disposal of products and materials can also impact health and the environment--with a disproportionate impact on communities of color. Please use this section of the application to highlight how the facility is addressing the use and minimization/elimination of certain **chemicals of concern**.

Policy

- 1.* Does the facility have **chemical or purchasing policies** that identify and avoid **specific chemicals of concern** contained in products and materials that may be hazardous to human health and the environment?

- 1.a* Please attach chemical or purchasing policies that address **chemicals of concern**:

Multiple policies can be attached via **zip file**, if necessary.

- 1.b* Please check all **chemicals and materials** included in the policy.

(Please note that other environmental attributes, such as water, energy, and packaging are evaluated in the EPP portion of this application.)

- ☐ Bisphenol A and its structural analogues
- ☐ CA Proposition 65 listed chemicals (carcinogens and reproductive toxicants)
- ☐ Flame retardants, including chlorinated, brominated, and phosphate-based flame retardants

Green Cleaning

2. Does the facility contract with an outside vendor for environmental services (EVS)?

- ☒ Yes
☐ No

2.a Please indicate the facility's contracted vendor for environmental services:

- ☐ Aramark
☐ Crothall
☐ Sodexo
☒ Other

2.a.a If other contracted vendor, please indicate which company:

3.* Has the facility conducted an inventory **in the last 18 months** of all products used at the facility for cleaning and disinfection of surfaces?

- ☐ Yes
☐ No

Conducting an inventory can identify where the hospital may be using multiple products for the same purpose in different areas of the institution. Standardization of cleaning and disinfection products can lower costs and improve training effectiveness and safety.

4.* Is the facility actively working on the transition to **third-party certified green cleaning chemicals** in alignment with Practice Greenhealth's **Green Cleaning Goal**?

- ☐ Yes
☐ No

*The facility should not respond yes to this question unless it has specifically tasked a person/team with this product(s) transition. For more comprehensive guidance about selecting green cleaning chemicals, see Practice Greenhealth's **green cleaning resources**.

5.* Does the facility utilize any **Green Seal** or **UL Ecologo** certified cleaning products?

☒ Yes

Please document **ALL** dollars spent on cleaning chemicals at your organization during 2021. For each type of cleaning product your organization selects below, a table will appear in which you need to enter **two numbers**--a value for green chemical spend and a value for conventional chemical spend on that particular product category. The table will **autocalculate** your total cleaning chemical spend and your % green spend for each category. If you are using 100% green certified chemicals for a product category, you **MUST** enter a zero for conventional cleaning chemicals for that same category in the table. If you are using 100% conventional cleaning chemicals for a product category, you **MUST** enter a zero for green cleaning chemical spend. No points will be awarded for rows with **incomplete information**.

Practice Greenhealth defines a green cleaning chemical as a cleaning product that is certified under either a GreenSeal or UL **Ecologo** standard. If you are unsure if your product is certified under either a **Green Seal** or UL **Ecologo** standard, take a moment to confirm at:

Green Seal

UL Ecologo

If your facility is using a **one-step disinfectant** cleaner instead of one of the cleaning products indicated below, please place a check next to the product category and enter the one-step disinfectant spend as conventional spend. In the U.S., EPA-registered hospital disinfectants are not yet allowed to be labeled or certified as green, because they are regulated as **antimicrobial pesticides under FIFRA**. The one-step disinfectant cleaner issue will be reviewed in a focus group with health care representation in advance of the 2023 awards cycle (a content update year).

5.a* Please select **ALL** cleaning product categories used at the facility. (You must include both conventional and green-certified product categories.)

- ☒ General purpose (hard surface) cleaners

- ☒ Window/glass cleaners
- ☒ Carpet and upholstery cleaners
- ☒ Bathroom/restroom cleaners

- ☒ We use a one-step disinfectant cleaner instead of one of the above product categories.

For any product category that has been replaced by a one-step disinfectant cleaner, please select the product category and enter spend as conventional spend. See instructions above.

Healthy Flooring

Flooring can be an important and negative contributor to indoor air quality. Hospitals are increasingly selecting flooring choices that avoid key chemicals and materials of concern. Learn more about Health Care Without Harm's **criteria for healthy flooring**.

27.* Is the facility actively working to select and purchase **healthier flooring** in alignment with Practice Greenhealth's **Healthy Flooring Goal**?

- ☐ Yes
☐ No

28.* Did the facility install any new flooring in the past year?

- ☒ Yes
☐ No

Please report dollars spent on **healthy versus conventional flooring installed in the past year** (carpeting is not included). To qualify as healthy flooring, it must meet the **Healthy Flooring criteria and/or have the Greenhealth Approved seal**. Please break out flooring **material costs only** and report in the **first row** of Table C3. Practice Greenhealth realizes some spend data may include non-material costs such as flooring preparation and labor costs. If costs for the **flooring materials only** are not available, **total costs** should be reported in the row 2 of the table. Flooring purchases should not be double counted -- spend should be reported in either row 1 or row 2, **but not both**.
