Facility Demographic Information

Practice Greenhealth recognizes that many of its partners are still facing challenging conditions due to the pandemic. Across the application, you may find questions that seek to understand the impact of the pandemic on hospital operations. It is critically important to understand how hospitals have created unique partnerships and/or pivoted to adjust their sustainability work or emergency response efforts in response to these pressing challenges. We also want to identify any new and emerging needs for resources during this challenging time.

If you have questions about the application, please contact your Sustainability Strategy Manager or [Awards Technical Assistance](#).

If you do not have data that is specific to this campus or facility, do not enter it. For instance, if your system of 3 hospitals had 400,000 total **adjusted patient days**, but you cannot break that out by facility, then leave **Adjusted Patient Days** blank. Likewise, if your health system bought \$5.6 million worth of computers, but you don't know how much was spent for each facility, please leave that field blank. **Please use this instruction throughout the application.**
