

Suggested Environmental Considerations for Television Systems and Services

Suggested Environmental Questions	Preferred Answer	Definitions	Rationale
Is this television EPEAT-registered at the Bronze rating or higher? (Yes/No/NA)	Yes	EPEAT (Electronic Products Environmental Assessment Tool) is a procurement tool designed to help large volume purchasers evaluate, compare, and select electronic products based upon their environmental attributes as specified in the consensus-based IEEE 1680 Standard for Environmental Assessment of Electronic Product. The registration requirements and a database of all equipment meeting the requirements are	Purchasing electronic products that have been registered as meeting the environmental performance criteria of the EPEAT system is preferable. Therefore once the IEEE 1680.3/EPEAT standard is final, Contractors can deliver or furnish television equipment products that have achieved Bronze registration or higher in the EPEAT system in
