

## UPCOMING WEBINARS

Practice Greenhealth hosts a set of webinar series designed to offer comprehensive and cutting-edge case studies, tools and resources on different sustainability topics to the health care community. Learn practical solutions from experts in the field without leaving your office. Pull together your committee or “green team” and join us.

### DATA 101 SERIES

#### **SAFER CHEMICALS/EPP - MEASURING PROGRESS WITH SAFER CHEMICALS: GREEN CLEANING, HEALTHY INTERIOR, DEHP/PVC REDUCTION**

Practice Greenhealth tracks targeted activities around safer chemicals in three areas – Green Cleaning, PVC/DEHP reduction and Healthy Interiors. Join Janet Howard as she reviews these three areas, explaining how to access the data and where to find Practice Greenhealth resources to support success in tracking movement towards healthier materials. Improve your award application through understanding the data requirements for the Safer Chemicals Section of the Award!

### DATA 101 SERIES

#### **VIRTUAL MERCURY ELIMINATION**

Practice Greenhealth presents a Making Medicine Mercury Free Award, to those organizations that go through the Mercury Elimination Check List and meet the award criteria. While most Practice Greenhealth members are virtually mercury free, if you are not, this is an important place to get started. Join Janet Howard to understand the Practice Greenhealth Making Medicine Mercury Free Award Criteria and how to go about meeting the requirements to get recognition for this important work.

### SAFER HAND HYGIENE

#### **THE CASE FOR ELIMINATING TRICLOSAN AND TRICLOCARBAN AND LESSONS FROM THE FIELD**

In light of environmental and human health concerns, Practice Greenhealth recently launched the Hand Soaps Challenge to reduce the use of triclosan and triclocarban in the healthcare setting. In this session, learn how leading hospitals implemented policies to eliminate the use of triclosan and triclocarban in hand soaps, from commitment through implementation. Hospital leaders with direct experience will discuss best practices, steps for overcoming challenges, internal messaging, strategies for achieving the challenges, and key partnerships in the purchase of safer hand soaps.

#### DATA 101 SERIES

### HEALTHIER FOOD

Join Thresa Pattee, Food Program Coordinator, Healthy Food in Health Care Program of Health Care Without Harm, to review the metrics and data collection requirements to track and report out on healthy food initiatives. Thresa will review the healthier food goals, the measurements to track progress year over year and share resources to help your organization make progress in this very important intersection of population health, environmental health and community resilience.

October 26, 2017 | 1:00 PM ET | [MORE INFO](#)

---

#### DATA 101 SERIES

### HOW TO CONDUCT A MATERIAL & WASTE BASELINE

Join Janet Howard, Director, Member Engagement and former health care waste manager for an overview of the categories that Practice Greenhealth has established in order for hospitals to use a standardized practice for measuring materials and waste. Janet will provide a step by step approach to understanding and tracking each waste stream, as required by Practice Greenhealth.

November 6, 2017 | 2:00 PM ET | [MORE INFO](#)

---

#### DATA 101 SERIES

### HOW TO TRACK FOOD WASTE REDUCTION

Join Janet Howard to review the protocol for an annual 24 hour capture of food waste generated to find a way to measure progress, without the hassle of continuous measurement. Janet will review the tools and resources available, the food waste streams and share resources to help your organization make progress in this very important intersection of population health, climate mitigation and waste minimization — and by the way — it reduces costs and has been documented to reduce the budget for food procurement.

November 9, 2017 | 12:00 PM ET | [MORE INFO](#)

---

#### CLIMATE AND HEALTH SERIES

### USING THE EPA WARM TOOL TO COMMUNICATE THE ENVIRONMENTAL BENEFITS ASSOCIATED WITH MATERIAL AND WASTE MANAGEMENT

Join the EPA as they explain how you can use the WARM tool to measure material and waste diversion efforts on greenhouse gas reduction and communication to key stakeholders.

November 14, 2017 | 12:30 PM ET | [MORE INFO](#)

---

#### LONG TERM CARE

### ENVIRONMENTAL STEWARDSHIP FOR EVERY GENERATION

Please join Crystal Saric Fashant, Hermine Levey Weston, and Janet Howard for a FREE webinar to learn more about the ways in which environmental stewardship is being embraced by the long term care community, and listen as Dr. Fashant presents key points from her doctoral dissertation study, Environmental Performance in Long Term Care Facilities.

November 15, 2017 | 1:00 PM ET | [MORE INFO](#)

---

#### LESS WASTE SERIES

### HEALTH CARE PLASTIC RECYCLING – IT'S NOT ALL RAINBOWS AND UNICORNS

Join Practice Greenhealth and the Health Care Plastics Recycling Council for a repeat of their sold-out CleanMed 2017 Pre conference workshop. Hear the latest from both Practice Greenhealth and HPRC around data, initiatives and learning opportunities. Perspectives will be shared from Gundersen Health System, HealthPartners and Mayo Clinic. Down in the weeds activities around bin placement, signage, training, storage and other challenges will be discussed. Bring your team and bring your questions.

November 29, 2017 | 12:00 PM ET | [MORE INFO](#)

---

#### DATA 101 SERIES

### GHG BASELINE DATA TRACKING AND GOAL SETTING

Join us to learn more about available tools for GHG baseline data tracking, new resources, and recommended targets from Practice Greenhealth to get started on this journey. Daniel Kreeger, the Executive Director with the Association of Climate Change Officers will share how other sectors have tackled this, and two health systems will present on their process of goal setting, data tracking, and how they've made progress towards those goals.

December 13, 2017 | 1:00 PM ET | [MORE INFO](#)

---

#### ENGAGED LEADERSHIP SERIES

### SUSTAINABILITY AND THE ROLE OF HUMAN RESOURCES

Join Coro Strandberg, Transformational Leadership Consultant, to understand how to fully embed sustainability into human resources and foster a sustainable culture in your organizations. This webinar will define sustainability as social and environmental sustainability and provide an overview of sustainability trends and drivers and the business case for sustainability.
