

RETHINK YOUR HEALTH CARE SUPPLY COSTS

Hospitals spend 25% of their budgets on medical supplies. Practice Greenhealth's new Greenhealth Cost of Ownership (GCO) Calculator tool will help hospitals assess the total cost of medical products, beyond the initial price tag. This includes the costs of using a product, maintaining it and disposing of it at end-of-life. The result: Smarter and more sustainable purchasing.

CONSIDER THE TOTAL COST OF OWNERSHIP OF YOUR PRODUCTS

1 GCO CALCULATOR & TOOLKIT

Visit www.PracticeGreenhealth.org/GCO to download the GCO calculator so you can begin assessing the true cost of a medical product – from the upfront costs to hidden expenses, such as water and energy use, maintenance, and waste services.

2 SIGN-UP FOR TRAINING

We are here to help make the GCO Calculator easy to use to compare and assess products. Go to www.PracticeGreenhealth.org/GCO to sign up for a training webinar so you can start using the TCO calculator and reducing costs to your facility and minimizing environmental impacts right away.

3 SHARE YOUR EXPERIENCE

Practice Greenhealth and the GCO user community will provide a way to share your experiences through special sharing calls, offer an opportunity to provide feedback on the tool, and get answers to your questions.
