My Health Matters:

Why a healthy environment is important to me

Meet your co-worker

Bob Rademacher, Facilities Engineering

A healthy environment is important to me because...

it improves the lives of our community and co-workers.

I contribute to a healthy environment by...

working with the facilities team to review the organizations energy usage in order to promote staff awareness and reduce waste through green initiatives.

Leading communities to a healthier future

Every employee can play a role in creating and maintaining a healthy environment.
